- ❖ **Expertise:** HTML, CSS, JavaScript, Es6, React, Node.js, MongoDB.
- ❖ **Comfortable:** Express.js, Tailwind, Bootstrap, React Query, Firebase.
- ❖ **Familiar:** JWT, Material UI,
- ❖ **Tools:** Chrome Dev Tool, Visual Studio Code, GitHub, Vercel, Netlify.

PROJECTS

1. Find Uke

| [Live Link](#) | [Client Side Repo](#) | [Server Side Repo](#)

- This is a full-stack website and authorizes admin, seller, and buyer for their different role. Buyers can book their resale product, the book seen in the dashboard, and payments using a card. Report to Admin for a product is added to let know the admin.
- A seller can add their product and see an added product in the dashboard. Seller also added their product for advertising. All data are taken from a database.
- Admin can handle buyers and sellers delete them and review them.

Technologies used: React, React-router, React Query, Firebase, Tailwind, NodeJS, Stripe, .MongoDB, Vercel etc.

2. Within-Mind

| [Live Link](#) | [Client Side Repo](#) | [Server Side Repo](#)

- You will see some services and added your service, every service has a details button to redirect the details page.
- The details page has service details and a review section where the user adds a review but this section is accessible only to those who are logged in.
- If the user login my reviews option will be added in the navbar this route shows user reviews.

Technologies used: React, React-router, Firebase, Tailwind, NodeJS, MongoDB, Vercel etc.

3. Seek-Wisdom

| [Live Link](#) | [Client Side Repo](#) | [Server Side Repo](#)

- The home page gives a total overview of this website and the courses page have 6 courses A pdf button is there to generate pdf.
- Each course card is dynamic so you click this card and redirect to your details page. This page has a premium access button for a protected checkout page.
- All the courses are taken from the data server.

Technologies used: React, React-router, Firebase, Bootstrap, NodeJS, MongoDB etc.
